-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 3, drawn to a method, classified in class 705, subclass 1.
- II. Claim 2, drawn to a system, classified in class 52, subclass 79.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case, the kiosk or system may be used in any environment where one desires to sell a particular type of product.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Art Unit: 3633

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Barry Haley on 10/24/07 a provisional election was made without traverse to prosecute the invention of Group II, claim2. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1 and 3 have been withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Said kiosk lacks a positive antecedent in claim 2.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3633

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Knight et al (2004/0088220) in view of Meyers (2285218).

Knight et al discloses an educational zone in a mall comprising(see abstract):

- a product storage kiosk unit, vending machine, that includes at least one stand alone vertical module in a child activity center such as a daycare center, educational zone;
- child specialty products, such as toys within the module for sale to visits to the child activity center; and
- child specialty products to visitors of the daycare center to eliminate additional shopping trips for child specialty products.

Meyers discloses a vending machine comprising a first stand alone product storage unit;

a plurality of glass doors 11 mounted on said vertical storage unit module; a plurality of, coin operated, locks each of which can lock a different door of the storage doors; child indicia 46 mounted on said storage unit capable of providing an aesthetic appearance for a child activity center; and

Knight discloses a child activity center such as a daycare center or an educational zone including a hallway for receiving said kiosk or vending machine.

It would have been obvious to include the vending machine of Meyers to provide a convenient means to sell novelty items for theme products.
